**Catalogue of the specimens of Amphibia in the collection ...**

Francis Walker (31 July 1809 – 5 October 1874) was an English entomologist. He was one of the most prolific authors in entomology, and stirred controversy during his later life as his publications resulted in a huge number of junior synonyms. Walker was contracted by the British Museum between June 1848 and late 1873 to catalogue their insects (except Coleoptera).

**Francis Walker (entomologist) - Wikipedia**

Cataloging is the process by which all the parts of a specimen are linked to the information associated with them through a unique identifying number – the catalog number. A specimen is cataloged by the physical process of entering its associated data in the relevant database, archival card catalog, or ledger.
