Amazon, where the book can be downloaded. However, when downloading books from Amazon, you may have to pay for the book unless you're a member of Amazon Kindle Unlimited.

Middle School Egg Drop Activity

The Egg Drop project is a highly-versatile activity that can be used to introduce students to physics, materials science, and fluid dynamics. For elementary and middle school classes, the students have a wide range of materials to 'buy' with their allotted budgets. For the high school classes, the budget and number of available materials are reduced, making the challenge more difficult and emphasizing the engineering design process.

Egg Drop - Center for STEM Education

Before the Activity Find a good spot from which to make the test airdrops. Ideally,

Egg Drop Challenge with FREE Printable Planning Sheet ...

Insert the raw egg into the pantyhose leg and put the egg in the middle, near the knee. Tie knots in the pantyhose on both sides of the egg so it cannot move. Place the pantyhose leg across the top of the shoe box opening with the egg in the center and pull it tight. Staple both ends of the pantyhose to the box.

Project Ideas for an Egg Drop With Instructions | Sciencing

The “Egg Drop” activity will engage students by inviting them to collaborate with their group/partner(s) and develop a method to protect the egg from a drop. They will need to use problem solving skills and creative thinking in order to execute this activity. A competitive element can be used to further engage the students.

Egg Drop Challenge Lesson Plan & Class Presentation Assignment

To begin this lesson students are tasked with the requirement to create a parachute of their own design that will slowly and safely regulate the drop of a raw egg from a height of approximately 25 feet. The egg must be intact after landing. The parachute with the slowest drop time and an intact egg is considered the winner.

Eighth grade Lesson Parachute Challenge | BetterLesson

Divide students into groups of four to six. Give each team a raw egg and instruct them to use the materials you will provide to devise a contraption to keep the egg from breaking when dropped from a height of 6 feet or more. In a central location, provide an assortment of inexpensive craft materials, such as:
