Chapter 11 Musculoskeletal assessment Lynne Gaskell
Introduction Students are often in awe of qualified clinicians who assess and make complex clinical reasoning decisions in real time with apparently little effort. Becoming competent in patient assessment, like most things in life, takes practice, refinement and reflection, and it looks easy when performed by an expert.

Musculoskeletal assessment | Musculoskeletal Key

Because patients with musculoskeletal injuries commonly seek intervention in the emergency department (ED), it has been proposed that practitioners with expertise in musculoskeletal practice can be of benefit in this setting. This clinical

commentary describes the rationale for utilizing physical therapists as musculoskeletal specialists in the ED.

The Physical Therapist as a Musculoskeletal Specialist in the Emergency ...

Musculoskeletal problems account for an estimated 3.5 million emergency department (ED) attendances each year. More patients will consult their general practitioner (GP) or treat the problem themselves. Most of these conditions (sprains, bruises, and aches) will be self limiting, requiring clinical diagnosis, and straightforward treatment and advice. However, there are diagnostic dilemmas ...

Epidemiology. The most widely cited study of the epidemiology of cervical radiculopathy was performed between 1976 and 1990 in Rochester MN [1]. The incidence of cervical radiculopathy seems to peak in the fourth and fifth decades in life [1•, 3]. Risk factors for cervical radiculopathy include white race, cigarette smoking, and prior lumbar radiculopathy [3-5].

Overuse tendinopathy is problematic to manage clinically. People of different ages with tendons under diverse loads present with varying degrees of pain, irritability, and capacity to function. Recovery is similarly variable; some tendons recover with simple interventions, some remain resistant to all treatments. The pathology of tendinopathy has been described as degenerative or failed healing.

Is tendon pathology a continuum? A pathology model to explain the ...
