The waves and the wind. Wave height statistical forecasting. ... We have to remember that not every wave reaches such a state, as it's required for the wind to constantly blow over the entire surface, which the wave passes for some time. And the stronger the wind, the more time, and distance is required for the formation of such a wave. ...

## **The waves and the wind. Wave height statistical forecasting**

Wind-wave generation in lakes, rivers, bays, and reservoirs is generally limited by the geometry of the water body, which is often very irregular. Most approaches to this problem consider wave generation only in the direction of the wind with fetch lengths averaged over small arcs of large arcs.

## **Wind, waves & weather forecast Nairn - Windfinder**

Waves are formed by wind blowing over the water surface. The three things needed to make waves are the wind speed; it's duration and fetch (the size of the wind area). If the wind duration is more than 24 hours, the swell is fully developed and even if it blows for a longer time at that speed, the waves will not
